Housekeeping – Exercises and Submission

How to solve the exercises

Write your answers clearly on paper.

For each exercise:

1. **Show how you represent the problem.**
2. **Show the intermediate steps of your reasoning and calculations.**
3. **Give the final answer.**
4. **Check whether your answer makes sense.**

You need to **apply the formulas yourself**. A list of the necessary formulas will be provided in the mateirals and separately in the exam.

> **A final answer without reasoning is not a complete solution.**

In the exam, you must solve similar problems **without external tools**.

Create the graphs using **Python**. If Python does not work, you may draw the graphs by hand.

Submission

Submit your work in **Moodle as a PDF**. This can be a scan or photo of your handwritten answer sheets, or a PDF created using another program.

Grading

A wrong but reasonable answer with meaningful reasoning can earn points.

An AI-generated answer that is incorrect or meaningless and does not demonstrate your own reasoning will not earn points.

Submitting by the given deadline gives 100% of the points. Submitting by the late submission deadline gives 50% of the points. A late submission gives no points.
